

Vision Session Feedback

- Great forum for sharing ideas and hearing from others what their perceptions are. Facilitators were highly informed and pedigreed group that led to effectiveness of groups and legitimacy of group leadership.
- Thanks HDR! Facilitation good, to much ground covered in short time. Excellent venue, agenda, and format. R Harris P.S: impressed with city and chamber staff.
- Sessions were very productive. Moderator made things move well and helped bring out more from everyone. In the future may want sessions which get into more detail for the solutions, pulling upon HDR's expertise. As many as possible should know about this session. An "executive summary" should be publicized widely.
- Session took one step but will require many before Green McKinney Implementation.
- Session-thought session moved well very informing. Need to know more on regulatory compliance.
- Well Organized, lets get started. ~Stan Graff- ElDorado Motors
- Good session-possibly a little more direction in what should come from breakout sessions. Communicate about what's been done and is being done, educate, educate!!!
- Great session!! Need more sessions to refine. Committee needs to make recommendations.
- I think this first session was informative and helped educate a diverse group. Thanks Sherie E.
- Going to have to get specific (case examples) of which sustainable ideas can be quickly adopted. Have to get HOA's involved quickly. They need to know where sustainability is going to impact HOA covenants.
- Good overall. I hate to say it, but more time to finish process. Share with all citizens in many ways as possible once complete. HDR really brought big guns. Congrats to them.
- The round table sessions were very informative. There was great input by everyone. The citizens of McKinney need to know what we are doing as a "task force". It would be great to meet again before formal recommendations go before the city council.
- Well done. Well Staffed. Make an effort to bring other cities into plan (neighbors). We are not alone.
- I thought there was great input in the two groups I sat in with. I learned a lot and am excited to participate more. Carolyn McGown
- City council definitely needs to be educated. McKinney needs to set the pace, not follow. Interesting presentation.
- I applaud the city for this initiative. Please move quickly and cautiously. Projects like these require leadership within the city to sort out direction and ideas. – Pat Lobb
- Session was informative and productive. Publicize these to public for additional advocates in the community.
- Didn't report out to whole, from groups. So when we see compilation it may be difficult to assess.
